01 The problem with paper receipts

"In the UK alone, receipts use ~10 million trees and 250 million gallons of oil" Techround in 2022

"An estimated 93% of receipts are printed on thermal paper coated with chemicals that renders them nonrecyclable" TreeHugger

Everything around us is, being digitised, made more accessible, greener, So why not receipts too?

This is why I decided to do something about it, and make receipts digital.
