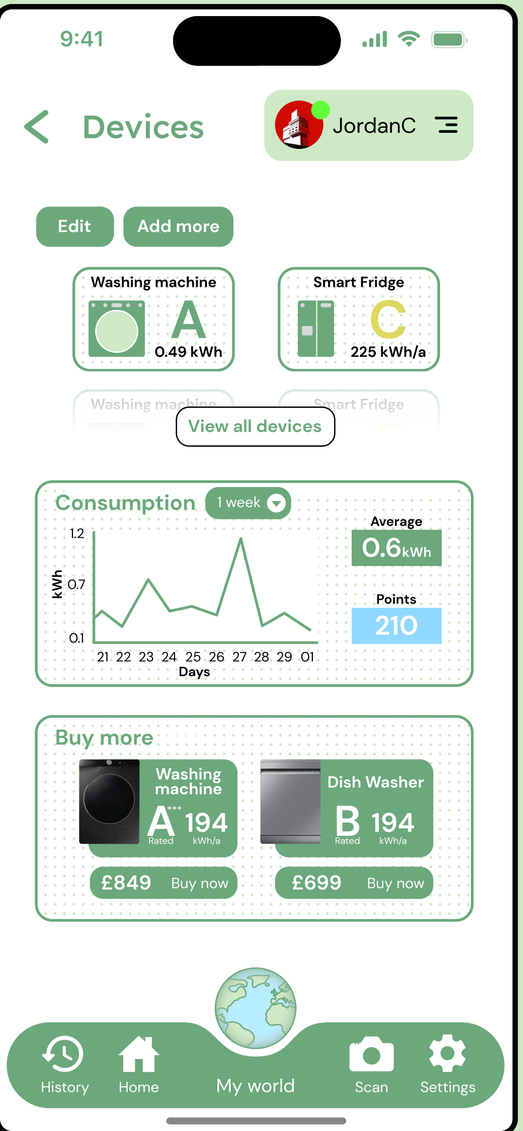
09 Connectivity



Living a greener, more eco-friendly life isn't just about buying better in your every day shopping. It's also about having eco-friendly devices.

I want to connect all your smart Samsung devices to the app so that you can track and visualise all your devices impacts in one place. I also want to add the ability to add the samsung washing machine filter to increase your points.

You also get more points for having more smart, eco-friendly devices connected. This incentivised them to not only buy more eco-friendly devices but also more Samsung Smart devices.
